

Description:

The State of Wisconsin Investment Board (SWIB) is seeking an experienced AI Engineer Contractor with expertise in the Azure ecosystem, specifically in machine learning and AI tools. The ideal contractor will have a strong background in both finance (asset management) and technology. The contractor will be responsible for developing and deploying AI solutions that enhance our investment strategies and operational efficiency. In addition, this role will involve coaching and mentoring existing team members to build their knowledge base and skill set in Azure-based AI technologies.
